## Out Reach Projects - Nepal May'15

### Nepal Earthquake Disaster Relief & Rehabilitation Effort...

The initial 7.9 magnitude quake, which has killed nearly 2,500 people in Nepal alone, claimed the lives of at least 18 climbers, making it the mountain's deadliest disaster to date.

Meanwhile a powerful aftershock was felt on Sunday in Nepal, India and Bangladesh and more avalanches were reported near Everest.

The 6.7-magnitude tremor, centred 60km (40 miles) east of Nepal's capital Kathmandu, sent people running in panic for open ground in the city.

We are raising funds to help the victims through couple of selected Nepal community organisations in the UK, Nepal Embassy staff in Germany & some direct contacts on the ground.

Anyone willing to take part in helping fellow human beings in this difficult situation could transfer funds direct to our Bank A/C
